1.1.1. *FAME: Help Desk for the EMFF monitoring and evaluation network*

Type	Service contract (1- year contract, renewable 6 times)
Budget	€ 0 in 2014
Subject	The ESI funds foster a stronger "result-orientation". In the case of the EMFF, this should be supported by a new Common Monitoring and Evaluation System and new evaluations functions and tasks are required. It is important that the right evaluation capacity is in place at the right time, both in the MS and in the Commission to support this new approach. This will require a long-term effort to build progressively the capacity to effectively address this challenge. This effort should be undertaken collectively with the MS in order to foster a reinforced evaluation culture in both Member States and DG MARE. A network of evaluators would be an effective way to reach that objective. The service contract foresees setting-up an external "Help-desk" to support this new dimension of the financial support for maritime affairs and fisheries. The tasks of the Help-Desk will be variable along the years, which indicates that yearly service contract would be an appropriate mean to deliver this support.
Implementing modalities	Call for tenders
Approximate timetable	Call for tenders to be published in the 3 rd quarter of 2014. Service contract to be concluded in the 1 st quarter of 2015.
